- Resistance level

There is no current Support Plan to trigger a buy of this stock at this time. This usually means that there are no clear support levels at this time, so buying the stock as it falls could be considered catching a falling knife. Buy signals only exist if resistance break higher. This often is a signal that the stock you are

Short under 35.49, target n/a, stop loss @ 35.75

There is no current Support Plan to trigger a short at this time. Shorts should be based on tests of resistance levels. In this case, the door is wide open for additional declines unless resistance breaks higher...
watching is weak. Waiting for a turn higher may be more intelligent than trying to catch a falling knife. In any case, new support levels are usually revised to the database at the beginning of the next trading session.

Please use the resistance plan as a short-indicator until new support levels have been added to the database. Usually revised trading indicators will update at the beginning of the next trading session.

Buy over 35.49, target 37.26, stop loss @ 35.23.
If 35.49 begins to break higher, the technical summary data will suggest a buy of HPQ over 35.49, with an upside target of 37.26. The data also tells us to set a stop loss @ 35.23 in case the stock turns against us. 35.49 is the first level of resistance above 35.27, and by rule, any break above resistance is a buy signal. In this case, resistance 35.49 would be breaking higher, so a buy signal would exist.

NONE.
Short under 35.49, target n/a, stop loss @ 35.75.
The technical summary data is suggesting a short of HPQ as it gets near 35.49, but the downside target is not available from the current data. This tells us to hold that position if it is triggered until a new downside target has been established (updates occur at the beginning of every trading session) or until the position has been stopped. The summary data tells us to have a stop loss in place at 35.75. 35.49 is the first level of resistance above 35.27, and by rule, any test of resistance is a short signal. In this case, if resistance 35.49 is being tested, so a short signal would exist.
