Price Based + Macro = Get an Edge on the Competition

- ✓ Price matters most to making good timing decisions, and the MACRO picture defines how restrictive you need to be with entry levels. Together, these are powerful.
- ✓ Review our Global Liquidity Report from December 2021 to see how our Macro work can foretell future market conditions. Look for the word "Volatility."

See how our macro tools differentiate current conditions from market-crash conditions.

Market Crash Leading Indicator

Our Market Crash Leading Indicator is Evitar Corte.

- ✓ Evitar Corte warned of market crash risk four times since 2000.
- ✓ Using the FOMCs Monetary Policy as a key variable in the quant.
- ✓ It identified the Internet Debacle before it happened.
- ✓ It identified the Credit Crisis before it happened.
- ✓ It also offered a warning prior to that period of time in 2019 when overnight lending spiked to 8.5%, but that amounted to nothing, and the conditions to become exposed resurfaced in Oct-Nov 2019.
- ✓ It identified the Corona Crash too, and protected investors from 21% of that loss.
- ✓ Evitar Corte is currently 100% exposed to the S&P 500 Index from March 2020 levels.

Using SPY-Cash, the Model/Strategy/Overlay beats the SPX by about 450% since 2000.

- ✓ 100% cash when market crash warnings come, and 100% exposed at all other times.
- ✓ Defense Wins Championships!

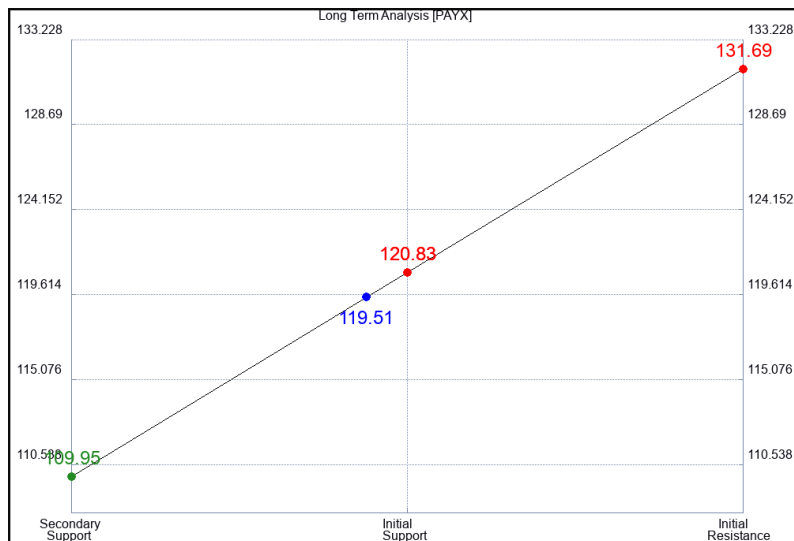

See what Evitar Corte Says about this environment and get notified when crash warnings come.

Entitlement Options:

1. Request entitlement through your institutional platform.
2. Obtain direct real time access from [Stock Traders Daily](#)

Repeat institutional readers already have assigned usernames (most likely). Please use our forgot user/pass feature, input the email address you use with your institutional platform, and we'll send your login details so you can access our updates.
